Dear Customers,
Dear Erzi Friends, ,

***Have you heard the news? The mobile phone has just had its 40th birthday.
The first model was 33 cm long and weighed 800 grams: Unbelievable!***

When we pick up a smartphone today, the enormous, innovative change and dynamics are quickly recognisable by comparison. If we project these dynamics onto other areas of life with similar speed and significance, it becomes immediately apparent what is demanded of people and especially our children nowadays. Qualitative learning situations, learning processes that work and good education are thus relevant and existential.

Erzi products want to be companions and instruments for this journey, from building materials for limitless imaginative play to detailed role-play accessories.

All our play and sports products make you want to play and move and are developed and manufactured in Germany in a responsible and sustainable way, lovingly designed and tested by experts. .

Test with us – welcome to the Erzi world!

We wish you a lot of fun and success with our Erzi products!

No panic, it's organic!

The very place for shopping ...

Shopping can be such a fun!

Erzi grocery stores have always been an all-round favourite in nurseries and group play areas. Shops and supermarkets form an essential part of role-playing games as they provide ample space for interaction and communication besides firing the imagination.

By nature, youngsters simply love doing the same things as grown-ups. Unconsciously, they learn to engage with other children and to rely on themselves whilst training their speech abilities, learning to count and to do simple arithmetic.

Sweet as Sugar and highly coveted

Fancy something sweet? Then come and visit our patisserie of wooden art on the peaks of the Erzgebirge mountains in Germany. Just behind the seven summits, at the seven peaks, there is a little crispy house with a big oven. Here, people lovingly tinker, chop, cook and bake. You can taste the love and smell the fragrance of the effort that went into our little darlings. The ingredients, of course, remain top secret.

All parts in this assortment are suitable for the youngest children, they do not contain small parts that can be swallowed or inhaled. All colours are resistant to saliva and perspiration. Water and Marble Run

length: 50,5 cm width: 14,5 cm
height: 7,5 cm weight: 2,35 kg

Content: 7 marble runs in wood; 4 wooden scrapers;
1 cork plug; 3 marbles in wood and glass
Material: beech, coloured laquered; birch plywood

"The goal is the journey itself". This is a playful method for children to learn by dint of hard work how rewarding the whole game can really be when the goal is finally reached. Running water or rolling marbles proceed on a downward course. No matter whether used in summer or in winter, indoors or out in the sandpit, children will derive fun and pleasure from this product everywhere and at any time of the year. A closer look at the way the Marble Course works suffices to disclose its true potential. A small dam brings the marble to a halt, causing the water to overflow. Small holes at the sides are ideally suitable for inserting small sticks or flowers which serve to decorate the route while enhancing creativity. A hole can make the marble or the water disappear and set it in motion again at another level. A supplied plug (cork) serves to complement this feature.

Our counting towers enable children of pre-school and primary school age to explore numbers through play. They help to develop an imagination for quantities. Likewise, they playfully – and simply – illustrate number decomposition, simple addition and subtraction, and the concepts of „greater than“ and „less than“. On the pegboards, numbers 1 to 10 can be explained with the cubes using four different coloured symbols (star – yellow, triangle – blue, square – green, circle – pink). Enabling the child's eye to quickly grasp and deal with small quantities. The clear symbolism also lets colour-blind children grasp the theme without barriers.

To many people, mathematics is a fully abstract term, often quite hard to grasp without means of illustration. The educational game **Fractions of a Whole** not only conveys a visual impression of fractions, but also allows kiddies to gain hands-on experience!

Educational Game Fractions of a Whole

length: 51,3 cm width: 15,1 cm
height: 7,6 cm weight: 736 g

Content: 1 large cube – to form a whole, 2 halves,
4 quarters and 8 eighths; 1 play mat (40x40cm)
Material: beech, nature; polyester fleece, printed

Constructed from solid beech, this unique system is designed to teach children the various parts making up a whole number. While playing with the three-dimensional pieces i.e. cubes, kiddies learn to distinguish whole shapes and their individual constituents such as halves, quarters, eighths, etc. When advancing to higher primary school grades, they then learn how to express these shapes abstractly in the form of fractions. This direct learning-by-playing method teaches youngsters the number of different possibilities of forming a cube, say from two halves, one half and four eighths, two quarters and one half, etc.

This educational game is highly recommendable
for children with special needs.
Size cube: 6x6x6 cm

INFO

The system comprises three principal components:

- Each part (whole, half, etc.) is designed as one self-contained solid unit instead of being made up of two pieces stuck together. This enables the formation to be visualized as a whole.
- All components are of the same colour (i.e. wood left in its natural state) so that they are easily recognizable as forming one single whole.
- Each piece is accorded its own space on the mat. If a cube needs to be formed from four quarters, the child removes each quarter from its mat and places it in the appropriate spot.

height: 7,6 cm weight: 973 g

Content: 6 geometric shapes (cube, quad, sphere, pyramid, cone and cylinder), 2 play mats (40x40cm)
Material: beech, nature; polyester fleece, printed

This didactic set helps children to understand basic geometrical principles. By seeing, holding and playing children learn the meaning of bodies, surfaces, shapes, symmetry and relations. It's made of solid beechwood.

Solids are 10 or 6 cm high and 6 cm wide/in diameter.

The children learn the basic geometric principles through play. They learn the meaning of shapes, size, bodies and surfaces, symmetry and harmony.

Children attribute relevant properties to geometric bodies by touching them. Didactic value is upgraded with matching geometric faces on the play mats for better understanding of surfaces, edges and corners.

Our Team Spirit balancing game is a birch plywood board that is playable on both sides. It can be moved and controlled using the attached strings. For two to nine players, children can playfully practise co-operation, co-ordination and collaboration. One side of our Team Spirit has milled track through which the two included steel balls whiz when all the players pull the right string. If you turn Team Spirit around, the plate acts as a flying carpet. One player sits on Team Spirit (while the brave at heart can also try to do it standing up), while all the other players lift it by pulling slowly and evenly. Team Spirit offers a unique play experience and lots of fun. Trust, consideration, reliability, cooperation and communication – diligently practised – lead to strengthened togetherness: that's the spirit!

INFO

Children love to hide and dress up.

Panto-Mimo combines these two penchants and provides ample opportunity for children to play. Handicapped or not, youngsters can rely fully on their own senses when joining in the Panto-Mimo game.

Panto-Mimo needs no particular instruction. Allowing children to play and move about at their own leisure encourages and challenges self-confidence, sense of balance, orientation skills, concentration and coordination.

The super Panto-Mimo is a real challenge especially with two children engaged in interaction with one another.

Balancing Board Branches

46381

length: 190 cm width: 24 cm
height: 9 cm weight: 9 kg
Material: birch plywood, nature and coloured laquered

In designing the branches, full focus has been on NATURE.
The spruce branch stubs firmly attached to the balancing board have been left in their natural untreated state and impart that true, unfeigned feeling of wood under the feet. In addition to right-left coordination training, this serves to exercise the medial and lateral arches of the foot.

Rocky Rocker

length:42 cm

width:28,5 cm

height:17 cm

weight:1,8 kg

Material: birch plywood, laquered

The Rocky Rocker is a game and sport product which can be used for young and old, as single product or as connecting point between two Erzi balancing boards. It corresponds to all current security standards and guidelines and offers nevertheless a design without any screws or nails. The Rocky Rocker is a natural product with love to the details and varied challenges to the exercise capacities of the children. The product can be used as stool and sitting or standing balancing seesaw. The seesaw demands from the user teamwork, balance, consideration, patience and coordination.

Rocky Rocker is a playing and sports device that can be used as a stool, a seat and a rock in either kneeling or standing position. In the sitting and kneeling position, the user may hold onto the rods. When placing an Erzi balancing board in the middle of Rocky rocker, it becomes a rocker for two children with numerous game variations (such as marble track). The rocker is great for walking (not running) over it. Placing a balancing board with one end on the Rocky Rocker and hooking this in forms a fixed ramp catering for a variety of different applications.

In most cases, however, Rocky Rocker can be used as a connection of two Erzi balancing boards. The interaction of the connected boards requires and encourages coordination and concentration skills. In this variant, both Erzi balancing boards should be suspended by the appropriate rods.
